La Mutuelle

Geneva, 8 January 2026

Dear Members,

On this new year, the members of the Board of Directors and the entire team of La Mutuelle would first like to extend their best wishes to you. May 2026 bring you health, happiness, and hope.

Through this letter, we wish to inform you that an update to the Association's Internal Rules and Regulations was adopted by the Board of Directors as of 1 January 2026. This revision of the document, originally drafted in 2018 at the time of the integration of GPAFI into the structure of La Mutuelle, has become necessary following the update of the brochures related to the services offered (loans, deposits, insurance, and mobility), as well as the gradual integration of GPAFI into the structure of La Mutuelle, which has led to the simplification of certain operational processes. While most of the changes made aim to clarify regulatory points that may have led to confusion or misinterpretation, the Board of Directors also wished, throughout the document, to draw members' attention to the importance of completing the documents required for the use of services, primarily loans and insurance,in a complete, accurate, and truthful manner. Failure to do so may result in exclusion. Unfortunately, this clarification has become necessary following an increase in cases of false declarations recorded over the past few years, mainly in connection with loan applications, which has led the Credit Committee to issue exclusion notices to several members of the Association.

The updated version of the Internal Regulations is available on La Mutuelle's website by clicking on the following link: Interal Rules and Regulations. Should you have any questions, please do not hesitate to submit them to La Mutuelle at the following address: lamutuelle@un.org.

Finally, the Board of Directors wishes to reiterate its full solidarity with members who have lost their jobs or who may be facing, in the coming months, an extremely difficult professional situation. As the mission of the Association is mutual support, please be assured that it already implements, and will of course continue to implement, within the limits of its capabilities, support measures aimed at assisting the affected members as effectively as possible.

While we warmly thank you for your continued support and loyalty, which form the foundation of your Association, we remain,

Yours faithfully.

Nataliya Myronenko
Vice President, Board of Directors

Giovanni Pizzini
President, Board of Directors
